

# Corrosion Rate Sensor Specification Rev M

**THIS SENSOR IS NOT COMPATIBLE WITH THE LOG-R ANALYZER**

<b>Body Style:</b>	3/4" NPT ABT with A1200 body style
<b>Cable Length/Connector:</b>	10'/3 Meter, AWG22, 2 conductor cable, no connector
<b>Maximum distance:</b>	200 Feet/60 Meters. Use AWG22 to lengthen
<b>Range:</b>	0.00 to 10.0 MPY
<b>Pressure/Temperature Range:</b>	100 psi / 7 bar at 100°F / 38°C
<b>Controller compatibility</b>	MultiFlex, ProMtrac and Aegis

NOTE: Never include low voltage sensors in conduit that contains AC voltages.

**Sensor Maintenance:** If deposits on the electrode withstand cleaning with a soft, moistened cloth, the following cleaning agents may be used:

General deposits:	Non-abrasive household cleaner
Scale or metal hydroxides:	Diluted hydrochloric acid, 0.1 to 0.3% for 3 to 5 minutes
Oil, grease:	Alcohol
Bio-fouling:	Mixture of diluted hydrochloric acid and pepsin for several hours

Reproducible rate requires constant flow, typically 3 GPM / 12 LPM

Do not touch metallurgical pins with fingers

Not orientation limited.

Temperature ratings: 100 psi / 7 bar at 100°F / 38°C

Maximum distance: 200' / 61 meters

## **Cleaning:**

**Never touch tips with bare fingers. Oil will interfere with reading.**

If sensor tips are rusted or corroded, scrape with screwdriver or knife. Polish with steel wool or plastic Scotch Brite (or similar). If tips are pitted, replace.

# Corrosion Rate Sensor Specification Rev M

Corrosion rate sensors can be ordered in the following metallurgies:

	Sensor Assembly (Includes Tips)	Tips Only
K03005 Pipe Grade Carbon Steel 1.00	<a href="#">7760746</a>	<a href="#">7760240</a>
<a href="#">A91100 Aluminum 1100-0 0.94</a>	Special order	
C11000 Copper 110 ETP Comm. Pure 2.00	<a href="#">7760747</a>	<a href="#">7760241</a>
C44300 CDA 443 Arsenical Admiralty 1.67	<a href="#">7760748</a>	<a href="#">7760238</a>
C70610 CDA 706 90/10 Cupro/Nickel 1.80	<a href="#">7760750</a>	<a href="#">7760239</a>
<a href="#">C71500 CDA 715 70/30 Cupro/Nickel 1.50</a>	Special order	
S30400 AISI 304 Stainless Steel 0.89*	<a href="#">7760749</a>	<a href="#">7760243</a>
Z17001 Grades 1A, 1, 2, 3, or 5 Zinc 1.29	<a href="#">7760745</a>	<a href="#">7760244</a>

\*Stainless Steel tips are poor indicators of corrosion rate. They are better suited to measuring pitting rate.

These sensors require a driver CR corrosion rate input card and are compatible with the MultiFLEX and Aegis controllers.

These sensors are not compatible with the LogR controller. Use only LogR sensors with the LogR analyzer and these sensors only with the driver CR card.

Dual input corrosion rate driver card [7760784](#)

**These sensors and driver card are not compatible with LogR standalone corrosion rate equipment. LogR sensors have electronic components embedded in the sensor. The above sensors have no electronic components. All measurement functionality is performed in the controller/driver card.**

CORROSION RATE SENSOR  
AND FITTING LAYOUT

A corrosion rate sensor is constructed of 4 sections; Holder, Body, Tee and tips. The tips are listed on page 1.

5/8" Sensor **Holder Kit**  
A261201 is SAP #  
**7760681**

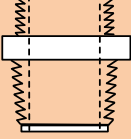

**1**  Cap

**2**  Retainer ring – Stainless

 PVC Spacer – 1/4"  
**7760209**

 #2-207 O Ring  
**7760359**

 1 1/4" ABS Sleeve  
**7760373**

**3**  Nipple  
**7760364**

3/4" Tubing Adapter  
(3 Pieces)

3/4" PVC Tee is not  
included in the  
holder kit

Threaded posts

## Metric Corrosion Rate Tee PN 1036738

To use the metric Tee, order the sensor package from page 1. This includes the sensor, tips and entry parts on page 2. Order the above metric Tee. Do not use the 3/4" PVC Tee part number 7741484. It will be included with the kit.

The following metric corrosion rate kits include the metric Tee  
7500805 – Carbon Steel corrosion rate sensor assembly - Metric  
7500824 – Copper corrosion rate sensor assembly - Metric  
7500825 – Zinc corrosion rate sensor assembly - Metric  
7500826 – Cupro Nickel corrosion rate sensor assembly – Metric

Each assembly kit includes:

The sensor assembly 7760242 (See page 3)

The tubing adapter 7760364

Spacer 7760209, O-Ring 7760359 and Sleeve 7760373

The tip set; Carbon Steel 7760240, Copper 7760241, Zinc 7760244 or Cupro Nickel 7760239

The Metric Tee 1036738

Other metallurgies available in the standard kit can be converted by ordering the metric Tee in addition to the kit.

This tee is not compatible with the LogR sensors.
