The new DULCO flex Control (DFXa) is an intelligent peristaltic metering pump that is valve-free and has the accuracy of a diaphragm pump. Applications include gaseous, highly viscous, abrasive, shear-sensitive and chemically aggressive fluids.

The liquid end of the pump is designed for a quick and simple replacement of the tubing, utilizing a unique exchange process. The pump display provides precise instructions on the steps required for the tube replacement. High-performance tubing consists of a TPV (Santoprene) or PUR (Polyurethane) material that provides excellent chemical resistance and a long service life.

The DULCO flex Control (DFXa) is powered by a DC motor and will provide continuous metering from 0.038 GPD (6 ml/h) to 17.7 GPH (65 l/h). Additional features such as communication protocol includes PROFIBUS, CANbus, Modbus and PROFINET.

Features & Benefits

- NSF61 Approved
- Volume adjustment in GPH or LPH
- Manual, Analog, Contact and Batch modes optional
- High visibility of LED-indicator lights
- Large illuminated display
- New configurable input/output port
- Pump is available as an FDA design
- CIP (cleaning in place) enabled system
- Turn down ratio up to 3,000:1
- Reverse flow is possible
- Dosing head can be aligned in four directions: Left, Right, Up and Down
- Integrated 7-day timer
- Viscosities to 10,000 cPs

Tube material: .................................................. TPV (Santoprene): available with pump versions 0730 and 0530
........................................................................... PUR (Polyurethane): available with pump version 0518, 0530 and 0565 only
Tube connectors: .................................................. PVDF/PTFE
Metering reproducibility: .................±2% with retracted tube (after approx. 200 revolutions)
Turndown: .................................................. 3,000:1
Electrical connection: .................. 100 - 230 V ±10%, 50/60 Hz
Nominal power: .................. approx. 45 W
Degree of protection: .................. IP 66, NEMA 4X Indoor
Permissible ambient temperature: ........... 14 - 113 ºF (-10 - 45 ºC)
Optional relay modules: .................. 1 x switch over contact, 230 V – 8 A or 2 x On, 24 V – 100 mA

Capacity data represents minimum values, tested using water at 68 °F (room temperature)
