The new DULCO flex Control is an intelligent peristaltic metering pump that is valve-free and has the accuracy of a diaphragm pump. Applications include gaseous, highly viscous, abrasive, shear-sensitive and chemically aggressive fluids.

The liquid end of the pump is designed for a quick and simple replacement of the tubing, utilizing a unique exchange process. The pump display provides precise instructions on the steps required for the tube replacement. High-performance tubing consists of a TPV (Santoprene) or PUR (Polyurethane) material that provides excellent chemical resistance and a long service life.

The DULCO flex Control is powered by a DC motor and will provide continuous metering from 0.048 GPD (0.18 L/D) to 7.92 GPH (30 L/H). Additional features such as communication protocol includes PROFIBUS, CANbus, Modbus and PROFINET will be available early 2020.

Features & Benefits

- Volume adjustment in GPH or LPH
- Manual, Analog, Contact and Batch modes optional
- High visibility of LED-indicator lights
- Large illuminated display
- New configurable input/output port
- Pump is available as an FDA design
- CIP (cleaning in place) enabled system
- Turn down ratio up to 3,000:1
- Reverse flow is possible
- Dosing head can be aligned in four directions: Left, Right, Up and Down
- Integrated 7-day timer
- Viscosities to 10,000 cPs
- DULCOneX-enabled

**Tube material:** ......................................... TPV (Santoprene): available with pump versions 0730 and 0530
............................................................... PUR (Polyurethane): available with pump version 0530 only

**Tube connectors:** ...................................... PVDF/PTFE

**Metering reproducibility:** ...................... ±2% with retracted tube (after approx. 200 revolutions)

**Turndown:** ............................................ 3,000:1

**Electrical connection:** ...................... 100 - 230 V ±10%, 50/60 Hz

**Nominal power:** ............................................. approx. 45 W

**Degree of protection:** ......................... IP 66, NEMA 4X Indoor

**Permissible ambient temperature:** .... 14 - 113 ºF

**Optional relay modules:** .................... 1 x switch over contact, 230 V – 8 A or 2 x On, 24 V – 100 mA

*Capacity data represents minimum values, tested using water at 68 ºF (room temperature)*
