

ProMinent® Sigma/ 1 Motor Diaphragm Metering Pumps

Overview: Sigma/ 1

S1Ca

Ideal for Economical mid-range applications

~~(see [page 138](#) for spare parts and [page 138](#) for control cables)~~

The ProMinent® Sigma/ 1 is a mechanically actuated diaphragm metering pump. It has a capacity range of 5.3-38 gph (20-144 l/h) at a max. back pressure of 174-58 psi (12-4 bar). The pump capacity is adjusted by varying the stroke length (4 mm) in 1 % steps via a self locking adjusting knob.

The reproducible metering accuracy is better than ± 2 % providing installation has been correctly carried out, and in the stroke length range of 30-100 %. (Instructions in the operating instructions manual must be followed.)

The stable, corrosion resistant metal and plastic housing is rated IP 65. To facilitate adaptation of the pumps to the widest possible range of processing requirements we offer a choice of three gearbox ratios, three liquid end sizes, two liquid end materials and either contact or analogue signal (e.g. 0/4-20 mA) control options in the form of the S1Ca Sigma controller.

For safety reasons, all motor driven metering pumps must be equipped with adequate protection against electrical overload.

Sigma/ 1 Basic Type (S1Ba)

The ProMinent® Sigma Basic type is a motor driven metering pump with no internal electronic control system. The ProMinent® S1Ba has a number of different drive options, including the single phase AC motor or a 3 ph. motor.

Different flanges are available so that customers can use their own motor to drive the pump.

Sigma/1 Control Type (S1Ca)

ProMinent® Sigma Controller
pk_2_104

The ProMinent® Sigma microprocessor version (standard IP 65) allows rapid and reliable adjustment to fluctuating metering requirements.

The controller has the same control panel as the ProMinent® gamma/ L metering pump.

The microprocessor controller of the Sigma pumps, featuring the optimum combination of variable AC frequency combined with digital stroking frequency, ensures exact metering even in the lower minimum range due to individual stroke control.

The individual pump functions are simply adjusted using the five programming keys. A backlit LCD indicates the current operating status, LEDs function as operation or fault indicators and fault indicator or pacing relays monitor the pump function.

PROFI® Local or remote control is possible with PROFIBUS® and/or an integrated process timer.

PROFI®
BUS

~~(see [page 138](#))~~

ProMinent® Sigma/ 1 Motor Diaphragm Metering Pumps

Standard Modes and Functions

Feed rate is determined by stroke length and stroke rate. Stroke length is manually adjustable from 1 to 100% in increments of 1% via the stroke length knob.

Stroke rate can be set to a maximum of 90, 170 or 200 strokes per minute (pump dependent). An illuminated LCD displays stroke length, stroke rate and an accumulative stroke counter, which can be cleared and reset.

Pump capacity output is displayed in either U.S. gph or l/h, set by the operator. Output is accumulated and totalized capacity is also displayed in either U.S. gallons or litres.

The “i” key is used to scroll information screens for stroke rate, stroke length, stroke counter, capacity and totalized capacity. Other information is available depending on control mode.

Control Modes

The control modes available with the Sigma/1 include manual, external contact with pulse control (multiplier/divider), batch, or analog control. The Profibus option includes all control modes, plus fieldbus connection.

In the “Manual” mode, stroke rate is controlled manually. The “Contact” external mode allows adjustments to be made externally (e.g. by means of a pulse-type water meter for proportional chemical feed). Pulse signals are fed into the contact input of the pump by an optional control cable. Each pulse from a water meter or pulse-type controller provides the pump an input to pump at the selected pulse ratio, up to the pump’s maximum stroke rate. Over-stroking the pump is not possible.

Standard Functions

“Calibrate”

The pump can be directly calibrated in-line to actual flow. Calibration is maintained within the stroke frequency range of 90/170/200 spm (model dependent). A warning indicator flashes when adjustments to the stroke volume are made outside the calibrated range of +/- 10%.

“Auxiliary Frequency”

An auxiliary frequency can be programmed. This default stroking rate can be enabled via the optional control cable.

“Flow”

The Sigma/1 series metering pumps will monitor their own output, with an optional adjustable flow monitor. Every fluid discharge is sensed and fed back to the electronic control circuit of the pump. If insufficient fluid is discharged for a predetermined number of strokes (up to 125), the pump automatically stops and the red LED lights. The optional fault relay changes state to issue an alarm or activate a standby pump. Call for availability.

“Float Switch”

An optional two-stage ProMinent float switch can be plugged into the pump to monitor chemical tank levels. An early warning is issued when the allowable minimum level is reached. The pump continues to operate while the display flashes, the yellow LED lights and an optional collective fault relay changes state to issue an alarm. If the liquid level in the supply tank drops another 3/4” (20 mm), the pump automatically shuts down, the LCD displays “Minim” and the red LED lights. The optional fault relay remains activated.

“Pause”

The Sigma/1 series can be remotely started and stopped via a dry contact through the optional control cable.

“Stop”

The Sigma/1 can be stopped by pressing the STOP/START key without disconnecting from the power supply.

“Prime”

Priming is activated by pressing both arrow keys at the same time while the frequency display is showing.

Function and Error Indicators

Three LED lights on the pump faceplate signal operational status. The green light flashes during normal operation, and the yellow light warns of a situation that could lead to a fault (e.g. low chemical). If a fault occurs “error” will appear on the LCD screen and the red LED light appears.

ProMinent® Sigma/ 1 Motor Diaphragm Metering Pumps

Optional Modes and Functions

Optional Control Modes

“Analog” Mode

With this option, the stroking rate of the Sigma/1 is directly proportional to the analog signal. For a custom range setting, the curve feature of the analog input can be selected. With this, the pump response to the analog input can be easily programmed.

“Contact” Mode with Pulse Control

This feature is used to “tune” the pump to contact generators of any kind (e.g. pulse-type water meter or process controller), and eliminate the need for a costly external control unit. The following functions can be selected by means of the keypad.

Pulse step-up (multiply) and step-down (divide)

By simply entering a factor in the 0.01-99.99 range, the step-up or step-down ratio is set.

For example:

Step-up Factor:

99.99 1 pulse = 99.99 pump strokes

10 1 pulse = 10 pump strokes

Step-down Factor:

0.25 4 pulses = 1 pump stroke

0.01 100 pulses = 1 pump stroke

“Batch” Mode

The Batch mode is a variation of the contact operating mode. A number of strokes can be predetermined up to 65,535 strokes (whole numbers) or the feed quantity can be predetermined. The batch is then initiated by either pressing the “P” key on the pump face or providing a contact to the external control cable.

Access Code

A programmable access code to prevent unauthorized changes to settings is available as an option.

An external panel enables optional relays to be installed on-site.

Relay outputs. . .

Fault annunciating relay

For low tank level (flow switch), loss of flow (flow monitor), loss of analog signal and diaphragm failure detector, system faults and fuse/power supply failure.

Fault annunciating and Pacing relay

In addition to the fault annunciating relay, a contact closure is issued with every pump stroke (contact duration 150 ms). This allows a second ProMinent metering pump to be paced synchronously, or to totalize flow with an external stroke counter.

4-20 mA Analog Output

A 4-20 mA analog output option is available for use with pumps that operate in the manual mode or by a remote 4-20 mA analog reference signal. The 4-20 mA analog output signal is linear to pump frequency multiplied by the percentage of stroke length. The output signal is isolated and can drive up to 300 Ohms impedance. Analog output can be used for status feedback to higher level control systems for closed loop control or for monitoring chemical usage. This option is available in combination with either the fault annunciating or pacing relay.

Timer Relay

The optional integrated 2-week timer offers 81 programmable events. It can be set to hourly, daily, work days, weekend, weekly or two-week periods with switch-on times from 1 second to two weeks. The timer can be programmed to change operation mode, frequency and the function of two relays. All the functions can be programmed independently of one another. Up to 13 delay times can be programmed into the timer function.

The range of applications exceeds that of a “standard timer”. Typical application is disinfection in cooling towers, process water, etc. with the ability to automatically program shock dosages or increase the concentration at a certain interval.

Fieldbus connection

Monitor and control remotely via a SCADA/PLC system using the profibus-DP system.

Note: Relay options not available with profibus. Profibus is not field retrofittable.

ProMinent® Sigma/ 1 Motor Diaphragm Metering Pumps

Specifications

General:

| <i>Maximum stroke length:</i> | 0.16" (4.0 mm) | | | | | | | | | | |
|---|--|---|---------------------------------|--------------------------------------|------|--------------|---------------|--------|--------------|---------------|--|
| <i>Power cord:</i> | 6 foot (2 m) 2 wire + ground (supplied on control versions) | | | | | | | | | | |
| <i>Stroke frequency control:</i> | S1Ba: Constant speed or optional DC/SCR drive or AC inverter S1Ca: Microprocessor control version with innovative start/stop and variable speed control proportional to set frequency or external control signal. | | | | | | | | | | |
| <i>Stroke counting:</i> | Standard on S1Ca | | | | | | | | | | |
| <i>Materials of construction</i> | | | | | | | | | | | |
| <i>Housing:</i> | Glass-filled Luranyl™ (PPE) | | | | | | | | | | |
| <i>Wetted materials of construction:</i> | Liquid End: PVDF Suct./Dis. Connectors: PVDF Seals: PTFE/Viton® Check Balls: Ceramic Pressure Relief Valves: PVDF/Viton® O-rings | 316 SS 316 SS_ PTFE/Viton® SS SS/Viton® O-rings | | | | | | | | | |
| <i>Drive:</i> | Cam and spring-follower (lost motion) | | | | | | | | | | |
| <i>Lubrication:</i> | Sealed grease lubricated bearings and gearing | | | | | | | | | | |
| <i>Warranty:</i> | Two years on drive, one year on liquid end. | | | | | | | | | | |
| <i>Factory testing:</i> | Each pump is tested for rated flow at maximum pressure. | | | | | | | | | | |
| <i>Industry Standard:</i> | CE approved, CSA available (standard in Canada) | | | | | | | | | | |
| <i>Diaphragm materials:</i> | PTFE faced EPDM with Nylon reinforcement and steel core | | | | | | | | | | |
| <i>Liquid end options:</i> | Polyvinylidene Fluoride (PVDF) or 316 SS, with PTFE faced Viton® seals | | | | | | | | | | |
| <i>Check valves:</i> | Single ball check, PVDF and SS versions. Optional springs available (Hastelloy C4) | | | | | | | | | | |
| <i>Repeatability:</i> | When used according to the operating instructions, better than ±2% | | | | | | | | | | |

| <i>Diaphragm failure indication:</i> | Optional, see accessories. Switch is N.C., opens to indicate failure. Switch rated 250 VAC, 0.3 A inductive or 0.5 A resistive; 30 VDC, 1.0 A resistive. Requires minimum 21 psig (1.5 bar) backpressure on pump. N.O. switch available upon request. Includes double diaphragm leak prevention. | | | | | | | | | | |
| <i>Max. solids size in fluid:</i> | 0.3 mm | | | | | | | | | | |
| <i>Stroke length adjustment:</i> | Manual, in increments of 1%. Motorized stroke length adjustment available. | | | | | | | | | | |

Sigma/1 Basic Version

Motor: See available motors in identity code

ProMinent® Sigma/ 1 Motor Diaphragm Metering Pumps

Specifications

Sigma/1 Control Version

Control Function: At stroke frequencies equal to or greater than 33%, the integral AC variable frequency drive continuously varies the motor speed in a linear response to the incoming signal. At stroke frequencies less than 33%, the motor starts and stops according to a control algorithm to provide the desired stroke frequency. In the start-stop mode the motor speed is constant at approximately 580 RPM.

Enclosure rating: NEMA 3 (IP 55)

Motor data: Totally enclosed, fan cooled (IP55); class F insulation; IEC frame; 1/8 HP (0.09 kW) 230 V, 3 phase (0.7 A)

Relay load
Fault relay only (options 1 & 2): Contact load: 250 VAC, 2 A, 50/60 Hz
Operating life: > 200,000 switch functions

Fault and pacing relay (options 4 & 5): Contact load: max. 24 V, AC/DC, max. 100 mA
max. 50x10⁶ switch cycles @ 10 V, 10 mA
Contact closure: 100 ms (for pacing relay)

Analog output signal: max. impedance 300 W
Isolated 4-20 mA output signal

Profibus - DP fieldbus

options:

Transfer: RS - 485
Wiring: 2-wired, twisted, shielded
Length: 3687 ft. (1200 m)/328 ft. (100 m)
Baudrate: 9600 bits/s; 12 Mbits/s
No. of participants: 32 with 127 repeaters
Topology: Line

Access procedure: Master/master with token ring
Relay cable (optional): 6 foot (2 m) 3 wire (SPDT) 250 VAC, 2 A

Pulse contact/remote pause contact: With voltage-free contact, or semiconductor sink logic control (not source logic) with a residual voltage of <700 mV. The contact load is approximately 0.5 mA at + 5 VDC. (Note: Semiconductor contacts that require >700 mV across a closed contact should not be used).

ProMinent® Sigma/ 1 Motor Diaphragm Metering Pumps

Dimensional Drawing: (S1Ca)

Dimensions in inches (mm)

| Type Sigma/1 | A | B | Suction/ Discharge Valve Thread C* | D | D1** | E | E1** | F |
|--|----------------|---------------|---|--------------|---------------|---------------|---------------|--------------|
| 12017, 12035, 10050, 10022, 10044, 07065 PVT | 11 (279) | 9.38 (238) | 1/2" MNPT | 3.54 (90) | 4.33 (110) | 10.8 (275) | 11.6 (295) | 3.8 (96) |
| SST | 9.75 (248) | 7.13 (181) | 3/8" FNPT | 3.5 (89) | 4.29 (109) | 10.8 (275) | 11.6 (295) | 3.8 (96) |
| 07042, 04084, 04120 PVT | 11.38 (289) | 10 (254) | 3/4" MNPT | 3.74 (95) | 4.52 (115) | 11.2 (285) | 12 (305) | 4.8 (122) |
| SST | 10.25 (260) | 8.13 (206) | 1/2" FNPT | 3.7 (94) | 4.48 (114) | 11.2 (285) | 12 (305) | 4.8 (122) |

* Piping adapters provided according to technical data.

** Dimensions with diaphragm failure detector.

Motor Pump Spare Parts

Sigma 1, 2, & 3

Valve
Complete

Complete liquid ends include pump head, valves, mounting screws, diaphragm and backplate. Clamping nuts and inserts are not included with complete liquid ends, complete valves or spare parts kits. Spare parts kits include:

PVT Liquid ends

- 1 Diaphragm
- 1 Suction valve
- 1 Discharge valve
- 2 Valve balls
- 1 Set of o-rings

SST Liquid ends

- 1 Diaphragm
- 2 Valve balls
- 1 Set of o-rings, complete (sleeve rings, ball seat rings)

| | Material Code | Liquid End Complete | Spare Parts Kit | Valve Complete | Diaphragm |
|--|---------------|---------------------|-----------------|----------------|-----------|
| 12017, 12035, 10050 with Liquid end FM 50 | | | | | |

| 08 (For pump versions 32002, 23004, & 10006) | S | 1000584 | 1001572 | 803792 | 803793 | 1000565 |
| 12.5 (For pump versions 14006, 10011, & 05016) | S | 910420 | 910470 | 803792 | 803793 | 485401 |
| 25 (For pump versions 07012, 04522, & 02534) | S | 910421 | 910471 | 803792 | 803793 | 485402 |
| 50 (For pump versions 04022, 02541, & 01264) | S | 910422 | 910472 | 803794 | 803795 | 485403 |

Pump & Systems Accessories

Accessory Kits

Accessory kits for alpha, concept^{PLUS}, beta and gamma/L pumps with tube fittings, including 5 ft. (1.5 m) of suction tubing, 10 ft. (3 m) of discharge tubing, foot valve and injection valve.

| Tubing Size (in.) (select to fit pump) | Material Code | Suction Tubing | Discharge Tubing | Part No. |
|---|---------------------|-------------------|---------------------|----------|
| 1/4 x 3/16 | PCB/NPB/NP3 | PE | PE | 7809401 |
| 1/4 x 3/16 | PPE/PP1 | PE | PE | 7809403 |
| 1/4 x 3/16 | PPB | PE | PE | 7809405 |
| 1/4 x 3/16 | PCE/NPE | PE | PE | 7809422 |
| 1/2 x 3/8 | PCB/NPB/NP1/NP3/NP6 | PVC | PE | 7809402 |
| 1/2 x 3/8 | PPE/PP1 | PVC | PE | 7809404 |
| 1/2 x 3/8 | PPB/PP2/PP3 | PVC | PE | 7809406 |
| 1/2 x 3/8 | PCE/NPE | PVC | PE | 7809423 |

PVC 1/2" x 3/8" suction tubing is flexible, allowing foot valve to sink. PE discharge tubing is rigid.

Pressure ratings are: PVC: 7 psig PE: 100 psig.

Tubing, foot valves and injection valves for TT and SS pumps are not available as kits and must be ordered as separate items.

Profibus adapters

5-pin, M12 x 1 to 9 pin., Sub D-plug, length approx. 11.8" (300 mm)

Y-adapter

2 x M12 x 1 male/female, 9 pin., Sub-D plug

Part No.

1005838

Adapter

1 x M12 x 1 male, 9 pin, Sub-D plug

1005839

Control Cables

Required for external control of ProMinent metering pumps including:

- beta
- gamma/ L
- delta
- Sigma/ 1 control
- Sigma/ 2 control
- Sigma/ 3 control

Description

Part No.

Universal control cable, 5-wire, 6 ft. (2 m)

1001300

Universal control cable, 5-wire, 15 ft. (5 m)

1001301

Universal control cable, 5-wire, 30 ft. (10 m)

1001302

(SEE DETAILED WIRING DIAGRAMS NEXT PAGE)

Pump & Systems Accessories

Control Cable Diagrams

Remote On/Off

BROWN and BLACK wires must be connected together via an ON/OFF contact or shorted together. When the contact is closed between the BLACK & BROWN wires, the pump will run. When the contact is open, the pump will stop.

Note: If ON/OFF control is the only control feature being used, WHITE, BLUE & GREY wires are not used and should be cut back.

BROWN: Remote On/Off (+)

BLACK: Common

GREY: Auxiliary Frequency

WHITE: Pulse (+)

BLUE: Analog (+)

Pulse Control

Pulse control will allow the pump to run in proportion to a pulsing potential free contact closure.

Note: BROWN and BLACK wires have to be connected together via an ON/OFF contact or shorted together. GREY wire is not used and should be cut back.

BROWN: Remote On/Off (+)

BLACK: Common

GREY: Auxiliary Frequency

WHITE: Pulse (+)

BLUE: Analog (+)

Analog Control (not available with beta metering pumps)

Analog control runs in proportion to an analog signal such as 4 - 20 mA.

Note: BROWN and BLACK wires must be connected together via an ON/OFF contact or shorted together. The BLACK wire is negative and the BLUE wire is positive. GREY wire is not used and should be cut back.

BROWN: Remote On/Off (+)

BLACK: Common

GREY: Auxiliary Frequency

WHITE: Pulse (+)

BLUE: Analog (+)

Auxiliary Frequency

Auxiliary frequency will allow the pump to default to a predetermined stroking frequency regardless of which operating mode the pump is in. The pump defaults to this stroking frequency as long as a contact is closed between the black and grey wires of the universal control cable.

Note: BROWN and BLACK wires must be connected together via an ON/OFF contact or shorted together.

BROWN: Remote On/Off (+)

BLACK: Common

GREY: Auxiliary Frequency

WHITE: Pulse (+)

BLUE: Analog (+)
