

ProMix™-S Polymer Blending System

New ProMinent Polymer Design!

The **ProMinent ProMix™** is a pre-engineered polymer mixing system made for the water and wastewater markets. Designed as an in-line unit, the **ProMix™** can be customized to meet most liquid polymer applications utilizing tubing pump technologies. The unique mixing chamber allows for complete makedown of the neat or diluted polymer to guarantee a problem-free injection.

Features and benefits

- Open design for easy maintenance
- True multi-zone mixing regime for proper polymer activation
- Unique injection check valve with easy access for cleaning
- Adjustable auto flush settings
- System protection against loss of water flow
- Precise activated polymer solution delivery
- LCD display with touchpad control
- 4-20mA input to pace pump
- Remote start/stop
- General alarm contacts

Applications

- Emulsion or Dispersion polymer activation
- Coagulant or Solution polymer feed
- Water and Wastewater treatment
- Clarification
- Sludge Dewatering

Specifications

- Water Inlet: 3/4" FNPT
- Polymer Inlet: 1/2" FNPT
- Product Outlet: 3/4" FNPT
- Max. Chamber Pressure: 150 PSIG
- Max. Operating Pressure: 100 PSIG
- Power Supply: 120 VAC, 1 Phase, 60Hz
- Current Load: 15 Amp
- Drain Connection: 1/4"
