

DULCOMETER® Controllers

Reliable process measurement and control

ProMinent® DULCOMETER® analyzers provide precise monitoring or controlling of process variables for Municipal and Industrial applications. DULCOMETER® products encompass a complete range of quality instrumentation from single channel transmitters to multi-channel disinfection controllers.

ProMinent® amperometric technology surpasses many of today's colorimetric methods by providing real time, on-line measurement without reagents or buffer solutions. Process variables include free and total chlorine, fluoride, chlorine dioxide, chlorite, hydrogen peroxide, peracetic acid and ozone.

Complete your application by choosing one of our standard, pre-engineered monitoring or control packages, which comes fully assembled including controller, sensors, sensor holder, wiring, backpanel and quickstart guide.
