

Dulcodes LP UV System

Make Your Facility Safe and Inactivate Infectious Organisms!

The unique **Dulcodes LP UV** systems are synonymous with cutting-edge water treatment – extremely efficient and highly effective. Our patented **Vario-Flux high-output lamps**, featuring dynamic lamp heating and controlled by electronic ballast technology allow the lamps to be quickly and precisely dimmed over a broad power range of up to 50% of the nominal electrical power.

Features & Benefits

Stay Safe

- 3rd-Party Validated to MAHC 3-log Cryptosporidium requirement and the 400 J/m² MS2 RED per the New York State DOH
- Systems are EPA registered: EPA Est. 94453-CHK-1
- Electronic lamp drivers automatically adjust to changes in water clarity
- High flexibility thanks to vertical or horizontal installation

Stay in Control

- Optimized design through intensive computer simulation resulting in minimal pressure loss and uniform radiation dose

Stay Economical

- Electronic lamp drivers run the lamps at lowest possible power level to save \$\$\$ and improve lamp longevity

- Dynamic lamp heating keeps lamps in the optimal temperature range
- Reduced life cycle costs due to the long service life of Vario-Flux high-output lamps with low energy consumption and high UV output
- Quick lamp change feature requires less labor
- IIoT ready

Certifications

- NSF50 (2012 standard); Annex H
- Single Pass validation for Cryptosporidium
- Electrical Certification: UL 508A, CSA C22.2 No. 14

Dulcodes LP UV System

Technical data

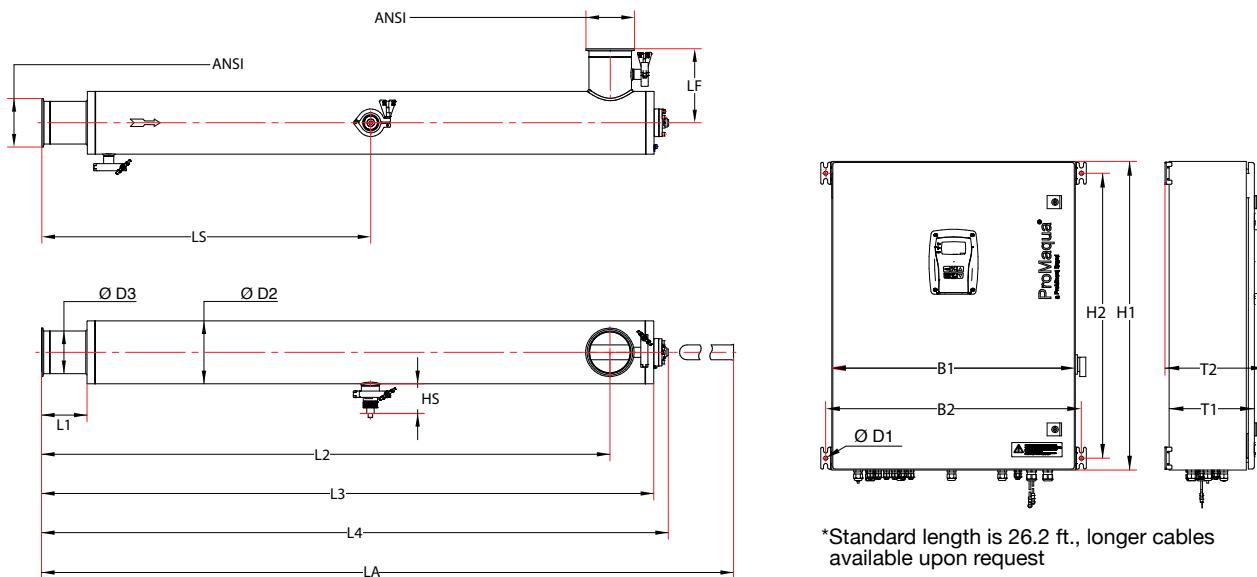

Lamp type..... Vario-Flux low pressure lamp
Controller type Delux controller
Permissible operating pressure 150 psi
Permissible ambient temperature... 41-104 °F
Permissible water temperature 37-160 °F
Enclosure rating..... NEMA 12 (NEMA 4 cabinet with A/C available as an option)
