

ProMinent® Evolution 2

Capacity range of single pump: 1.7 – 227 gph @ 5800 – 155 psig

The **ProMinent® Evolution 2** meets the most exacting safety requirements as an extremely robust hydraulic diaphragm metering pump. It stands out thanks to its PTFE multi-layer diaphragm with integral diaphragm rupture warning system and unique diaphragm position control. Its modular construction offers excellent flexibility for countless applications.

The **ProMinent® Evolution** hydraulic diaphragm family of metering pumps form an integrated product range with **stroke lengths of 0 to 40 mm**. This covers the capacity range of **0.79 to 1,955 gph** at pressures ranging from **5800 to 145 psig**. The **ProMinent® Evolution** product range is designed to comply with API 675. A wide range of drive versions are available, including some with ATEX certification for use in Zone 1 or Zone 2 areas at risk from explosion.

Features & Benefits

Maximum process reliability

- PTFE multi-layer diaphragm with integral diaphragm rupture warning system is standard on all pumps
- Integral hydraulic relief valve
- The exclusive Diaphragm Position Control protects the pump against operating faults (e.g no damage in the event of a blockage on either the suction or discharge side)
- Metering reproducibility is better than $\pm 1\%$ within the 10 – 100 % stroke length range under defined conditions and with correct installation
- Continuous bleeding of the hydraulic oil chamber ensures reliable operation

Excellent flexibility

- The Evolution's modular compact construction allows for a wide range of applications. The Evolution can be multiplexed with up to five (5) metering units of identical or varying pump capacities for the greatest application adaptability
