SlimFlex Controller

SlimFlex Series Cooling Tower Controllers

The **ProMinent**[®] **SlimFlex** uses the latest technology to provide reliable control and flexibility at a competitive price.

Standard Features

- Conductivity & temperature inputs
- Two digital inputs for water meter & flow switch
- Four relay ouputs
- 5-Key universal keypad
- 2 Line, 16 character backlit display
- Built-in diagnostics
- CSA/CE/UL approved
- NEMA 4X enclosure
- Umbilical type plug connections

Options

- Communication Options: Ethernet networking, dry contact alarm relay or 4-20 mA output on conductivity

000

- pH Control
- ORP Control

Benefits

- Selectable Inhibitor Feed: Provides 4 feed modes; bleed and feed, bleed then feed, proportional to makeup water volume and percentage time
- Water Mater Input: Allows for chemical to be fed based on water volume versus timed pump control methods generally found on comparably priced controllers.
- Single Point Calibration: For ease of start up and operation. Warning message immediately detects fouled or faulty sensors.
- **Robust Diagnostics:** *Provides complete 24-hour history of bleed valve operation, relay run times and minimum/maximum temperatures.*
- **Keypad Password:** Eliminates unauthorized adjustments.
- Optional Web Browser User Interface with Networking Capability: *Provides live views with complete programming and calibration capabilities remotely using a LAN or WAN. View our live demo at http://208.37.73.86:1007*
- Dual 28 Event Biocide Timers: Programmable for 1, 7 or 28 day cycles. Prebleed on time and/or conductivity setpoint and lock-out program.
- Sequential Blowdown Control: Measures make-up volume then bleeds for user set time.

SlimFlex Controller

Specifications

| | Rating - Detail | Notes |
|-------------------------------|--|---|
| Analog-Digital I/O | | |
| Conductivity Sensor | Auto ranging from 100uS to 10,000uS | Single point calibration, temperature compensated |
| Temperature Sensor | 32°F to 125°F (0°C to 50°C) | Displayed as F or C |
| Thermal Flow Switch | 1GPM trip within 30 seconds | Typically 10 second trip within FLOW / NO FLOW |
| Water Meter Input | 400Hz, 0.5mA @ 5VDC measurement current | Accepts paddlewheel or contacting head |
| Relay Outputs | 4 SPST | Single controller fuse |
| 4-20mA Output (optional) | Single DC isolated, loop powered | User definable span, alarms on open loop |
| Alarm Relay (optional) | 500mA @ 24VDC Dry contact set, unfused | Normally closed contact, open on alarm |
| Communications Use | er Interface | |
| Keypad-LCD | 5 Key tactile feedback, universal characters 2 line x 16 character, backlit | Scan rate 100 mS nominal User adjustale contrast |
| 10 Base T, TCP/IP | HTML micro web server with user | User definable static IP |
| Ethernet LAN (optional) | definable IP address | Remote Monitoring & Programming |
| Controls | | |
| Relay ON/OFF | ON/OFF control | 4 Relay Outputs |
| Volumetric | User set, measure volume & pump on | Sequential control, measures make-up |
| | time | volume then bleeds for user set volume |
| Interlocking | Flow switch contact set input | Relays OFF when contact set opens |
| Blocking | Inhibitor feed may be set to block on bleed | |
| Alarms - Feed Limit Timers | Minutes per day | Auto-reset @ Midnight |
| System | | |
| Units of Measurement | US/Metric selectable | Option to use US or Metric units of measurement |
| Electrical | 120VAC, 50/60Hz | |
| Internal Fusing | 5 AMPS @ 120VAC | |
| Surge Suppression | Relay 2 N.O. (bleed) contacts snubbed | Varistor on AC line input |
| | @ 0.1uF, 150ohm | |
| Accessory Power | 15-22VDC, unregulated, thermally fused @ 50mA | |
| Enclosure | Non-metallic, NEMA 4X | 5.9"W x 5.9"H x 3.5"D |
| | | (150mm W x 150mm H x 90mm D) |
| Certifications | | |
| CSA, CE, UL | CSA tested to comply with UL | |
| | 1 | <u>I</u> |
