

Orlita[®] Mf Series

High Accuracy Metering

The ProMinent[®] Orlita[®] Mf is a hydraulically-actuated metering pump capable of reaching flows up to **2,200 gph (8,325 l/h)** per head and pressures up to **11,350 psi (783 bar)**. A double PTFE diaphragm seals the liquid end from the hydraulic chamber while a unique cone valve design in the suction and discharge valve guarantees optimum accuracy.

The hydraulic chamber is equipped with internal pressure relief along with an automatic vent valve. These features allow the Mf to operate at high conditions and many different applications.

ProMinent[®]

Applications

- Glycol injection
- Catalyst injection
- Methanol injection
- Molten Sulfur
- LDPE Production
- Drag Reducers

Markets

- Oil & Gas Production
- Refineries
- Chemicals
- Petrochemical
- Environmental
- Water treatment

Features & Benefits

- In Accordance with API 675
- Accuracy +/- 0.5%
- Multiplexing Available
- Flow rates to 2,200 gph per head
- Temperatures from -40 to 300°F (-40 to 150°C)
- Unique cone valves
- PTFE double diaphragm
- Diaphragm rupture control
- Operating Pressures to 11,350 psi
- Special connections as requested
- Heating or Cooling jackets

ProMinent[®]
