ProMinent® Packaged Analyzers

Reagent free!

ProMinent® Packaged Analyzers provide precise monitoring or control of chlorine for potable and wastewater applications. These engineered systems utilize the latest amperometric sensor technology resulting in a "reagent free" on-line analysis with no colorometric concerns or reagents.

These chlorine packages are fully plumbed, wired and assembled on a backpanel for easy wall mounting. Choose one of three packages by just selecting one part number which includes a microprocessor analyzer, flow cell, flow sensor and a (2 or 10 ppm) chlorine sensor.
