New solenoid cable connections

Within a short period, Beta and GALA solenoids will be equipped with a new solenoid cable connection. This new plug-and-socket-connection offers a number of advantages such as an easier and more secure electric connection.

This cable is also used for Concept Plus ( CNPa ) pumps,

The new cables are not compatible with the old solenoid cables so that the solenoid cables need to be ordered with replacement solenoids or a defined quantity of the cables should be kept on stock.

Part # VDE Cable: 1021694

Part # UL Cable: 1021953

In Canada and USA, the UL cable is used.
